

# DAIMLER TRUCK

## Manage Partnumbers Weight

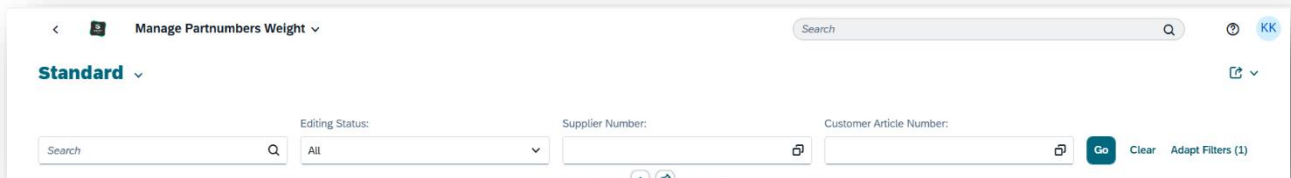

**Step 1:** To display weights, open the **Manage Partnumbers Weight** app within **EDI Quality [smartIBL]** in the **Supplier** workzone.

This function shows the partnumber weights based on the last change and allows editing via the **Edit** button.

**Step 2:** To filter the weight data, you can use the following filters: Search, Editing Status, Supplier Number, Customer Article Number.

After clicking the **Go** button, the data matching the selection will be displayed.

**Step 3:** Please go to the detailed view. To **edit** the weight, click the corresponding button.

**Step 4:** Enter the weight of the part number in kilograms (10 digits, including four decimal places). Click **Save** to store the weight.
