Field Content

- ✓ The number must not repeat within a year
- ✓ The format must be 9-digit, numeric
- ✓ If the package item number is not 9 digits, please fill it with leading zeros
- ✓ These can become mandatory fields in certain processes

A 9-digit package item number is a prerequisite for the processing of your data and the generation of GLT/KLT labels. The data is used for both material tracking and further processing at freight forwarders (incoming scan) and at Daimler Truck AG plants.

Details can be found in the EDI Manual, Chapter 03.1 – 1.6.1.5 Record Type 715.

Daimler Truck AG
