Additional terms of use for the "proQ" application

Daimler Trucks (hereinafter "DT")¹ provides its partners with the application "proQ" ("proQ") via the Daimler Supplier Portal. The use of the proQ application is subject to the following additional terms of use ("proQ Terms of Use" or "these Terms of Use") and the terms of use of the Daimler Supplier Portal. In the event of any conflict between the Daimler Supplier Portal Terms of Use and the proQ Terms of Use, the latter shall prevail.

1. Scope of Application

1.1 These Terms of Use govern the use of the Application by the Partner within the scope of its business relationship with DT ("DT Business Relationship").

1.2 With the aid of the proQ application, the Partner can, within the scope and for the purpose of the DT business relationship, manage its supply relationship and exchange information relating to the initiation of contracts (in particular participate in tenders, submit offers, exchange draft contracts and view agreed prices), among other things. Provided that the Partner also accepts the additional terms of use for the eAccept function, the contract can be concluded in the proQ application via eAccept.

2. Access and Registration

2.1 In order to use proQ, the Partner must agree to these Terms of Use. This consent is given by the Partner acknowledging and agreeing to these "Additional Terms of Use for the proQ Application" through a legal or authorized representative in the Daimler Supplier Portal by clicking on "I agree".

2.2 After agreeing to these Terms of Use, the employees authorized by the Portal Manager shall be entitled as registered users ("Users"). Only users registered by the Partner ("Users") are entitled to use proQ through the Partner.

2.3 In order to comply with applicable competition law and confidentiality agreements, DT marks the content in proQ in such a way that users who are registered in proQ for more than one company of the partner can identify the company for which the content is provided before accessing the content.

2.4 Further functions can be called up from proQ, the use of which requires separate authorization, in particular the eAccept application, with which legally relevant declarations of intent can be made and contract offers accepted.

3. IT Security

The partner shall ensure that it takes technical and organizational measures in accordance with the state of the art in order to secure the data that can be viewed and exchanged in proQ. In particular, it shall

- treat its user name and the associated password as confidential and refrain from forwarding it to third parties;
