smartIBL – Our path into the future

Spin off

Increasing Digitalization

Daimler Truck-wide Tool Go Live

Global Transformation

Our path

SMARTER LOGISTICS, SMARTEST MOVE

Challenges of the current system

Complex processes	High maintenance effort
No standardized processes	Heterogeneous landscapes

The future of inbound logistics will be smart

New basis for design and improvement	Error reduction and process optimization
Global and harmonized processes	User-friendly platform

IBL Landscape

Transformation

smartIBL

2025

Change transactions in EDI Quality

transactions IBL

D301	Search consignment data
D302	New consignment - existing order number
D303	New consignment – series/non series
D340	Search transport references
D400-D405	statistics
D500	Manual delivery notes
D502	Incorrect EDI data
D510	Search article weight

NEW - smartIBL

Consignment Cockpit	Display and correction of EDI ASN data
	Creation of webEDI ASN data with an existing order number
	Creation of webEDI ASN data for serial and non–serial parts
Transport Referances – not in Go-Live Scope	Comparison of transmitted consignments and transports
Reporting	Various reporting functions
Carrier Statements	Display and commenting functions for: – manually recorded delivery notes entered in the goods receipt systems of DTAG – erroneously transmitted EDI messages (ASN)
Manage Partnumbers Weight	Verification and correction of part number weights

Change transactions in EDI Quality

transactions IBL

I002	Personal settings
I023	Unloading point information
I030	GS contact persons
I040	Suppliers in carrier area
I060	Debit notes
I065	Cost rates
I071	Refund display

NEW - smartIBL

Supplier / Carrier Preference	Self-service functions for user preferences regarding notifications
-	EDIS unloading point routing via CarlEDI
Search Area Carrier	Search for suppliers to determine the responsible area carrier
Search Supplier in Area	Search for area carriers to identify the suppliers located in the area
Display Debit Notes	Overview of quarterly reports on the incurred rework efforts
Cost Rates	Overview of cost rates for rework efforts in the goods receipt areas
Display Debit Notes	Overview of quarterly reports on the incurred rework efforts incl. credit notes

Change transactions in EDI Quality

transactions IBL

| IBL	Description		smartIBL	Description

Training opportunities

Training materials will be directly available on the smartIBL platform from GoLive!

Self-learning concept

1. Click guides

2. Training videos

3. Mouseover-features within smartIBL
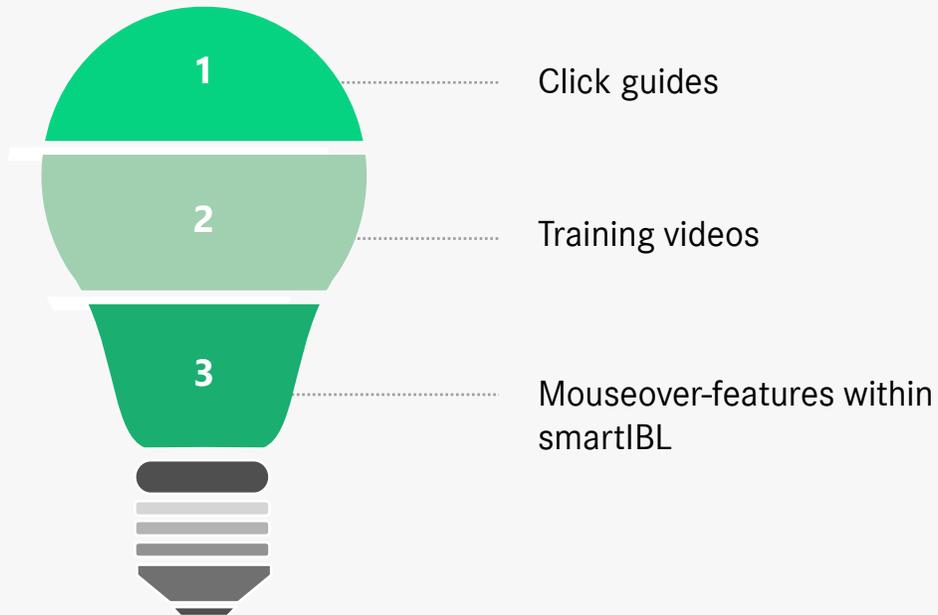

View available training materials
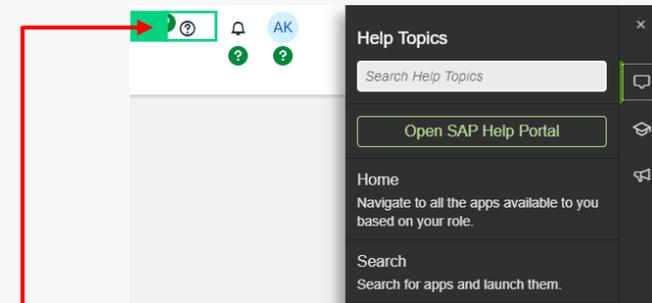

Available training materials can be viewed by clicking the (?) symbol in the top right corner of each page or under "Get help" on the Home page.
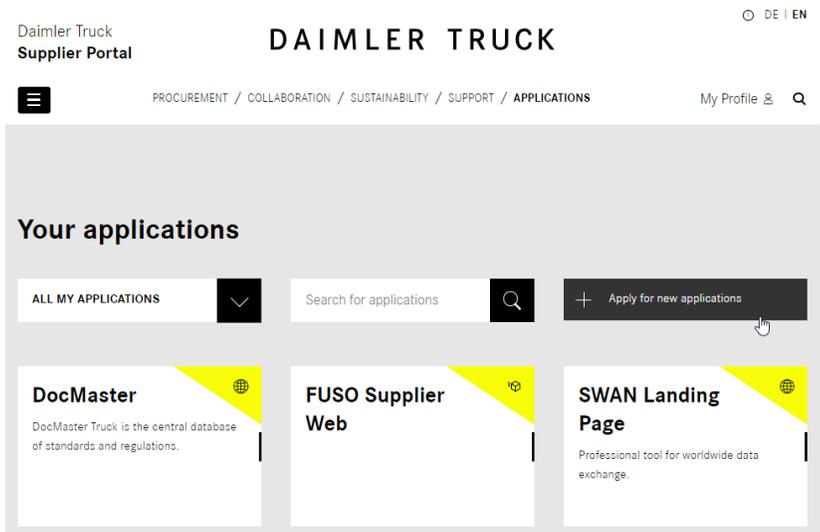

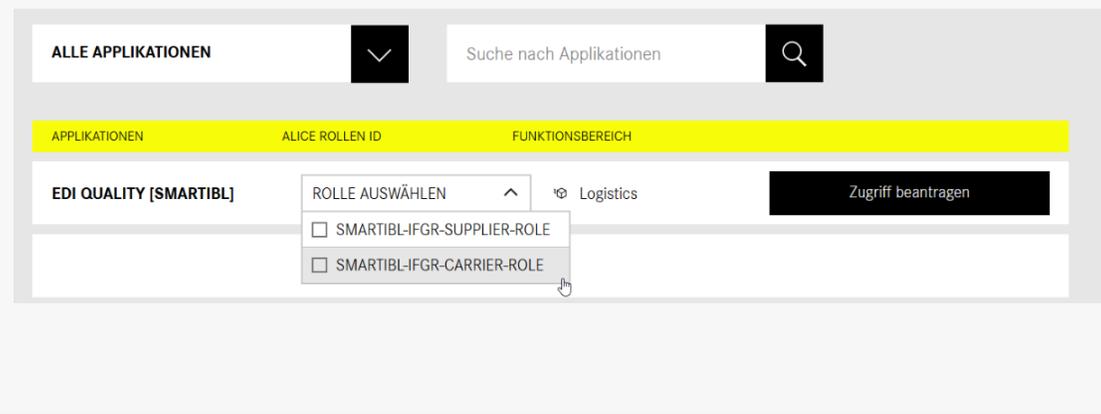

System login & authorization (1)

Step 1

Apply for new applications

› **Existing IBL users** will be **automatically** transferred to smartIBL.

› **New users** must request the role in advance via the Supplier Portal under **Apply for new applications**

Step 2: Request Access

› Enter the following values in the "Add more applications" function

  › All applications: **Logistics**

  › Search for applications: **EDI Quality**

› As a result, you will receive an overview that includes the roles **SMARTIBL-IFGR-SUPPLIER-ROLE** and **SMARTIBL-IFGR-CARRIER-ROLE**

› Please select the correct one and then click on "Request Access"

› Your responsible portal manager will receive the access request and have to approve it

System login & authorization (2)

Step 3

Login to the system

› After the **approval** of your request by your **portal manager**, you can now open the application **EDI Quality** via the Supplier Portal

EDI Quality [smartIBL] ›

› If your user ID is missing additional supplier indices/locations, you can apply for further memberships under "My Profile", "My Organizations".

› For the respective organizations, the corresponding application/role must also be requested.

› The portal manager's approval must be obtained for both organizations and applications.

Step 4: System access

System login & authorization (3)

Further information on the Supplier Portal

› On Topics such as:

   › Support Request

   › Portal Managers

   › User ID

› **Link:** Support | Daimler Truck Supplier Portal

Supplier Portal

First Steps for System Access smartIBL

Check Email Notification Settings
› App: Supplier/ Carrier Preference

Creation of Templates for webEDI Entries
› IBL: D303, T603
› New: Function „Save as Template"

Label print
› Label creation and printing are still possible.
› New: Function „Print Documents"

Select filter settings and default views
› See the training video: Link

Technical system requirements

Link

Browser and Platform Support | SAP Help Portal

Login to the system (requirements)

› We use SAP Fiori Launchpad for the platform

› If problems occur, make sure you are using one of the supported web browsers:

  › see link
